## VISION AND MISSION

**CREATIVITY : EVERYTHING THAT WAS  
NOT THERE BEFORE, BUT REALISED SO  
ESSENTIAL AND GLOBAL**

*- BRUNO MUNARI*

In 2H we design and build unique environments that are safe, functional and are of a very high quality. Our *mission* is to excite through the habitat we create whether it's houses, offices, shops, hotels, places for children, design. For over 30 years we have combined the willingness to give new life to various environments, choosing only the finest materials, the finest finishes and the most functional solutions. We create environments promoting well-being, and making you feel immediately at ease. Day after day we strive to make your dreams become a reality.

# WHO WE ARE

2H started in 1986 designing and manufacturing complete furnishing solutions for kindergartens, primary schools, entertainment centers, libraries and playgrounds. Over the years we have gained specific expertise on the human environment, we understand the human being's basic needs, striking the child and less obvious in adults.

Building on from our know-how we have extended our business to different habitats, including commercial areas, houses, offices, hotels, libraries, outdoor.

Today we work in Italy and abroad, bringing our skills in every project, maintaining high curiosity about the human aspects that never cease to fascinate and inspire us to new experiences.

We also work in collaboration with contractors and international architectural bureaus.

# WE SHARE VISION

To design and create a unique environment we start with studying your needs. We listen and understand every aspect. We will work together to achieve the style of the new environment that is best suited to our customer's needs.

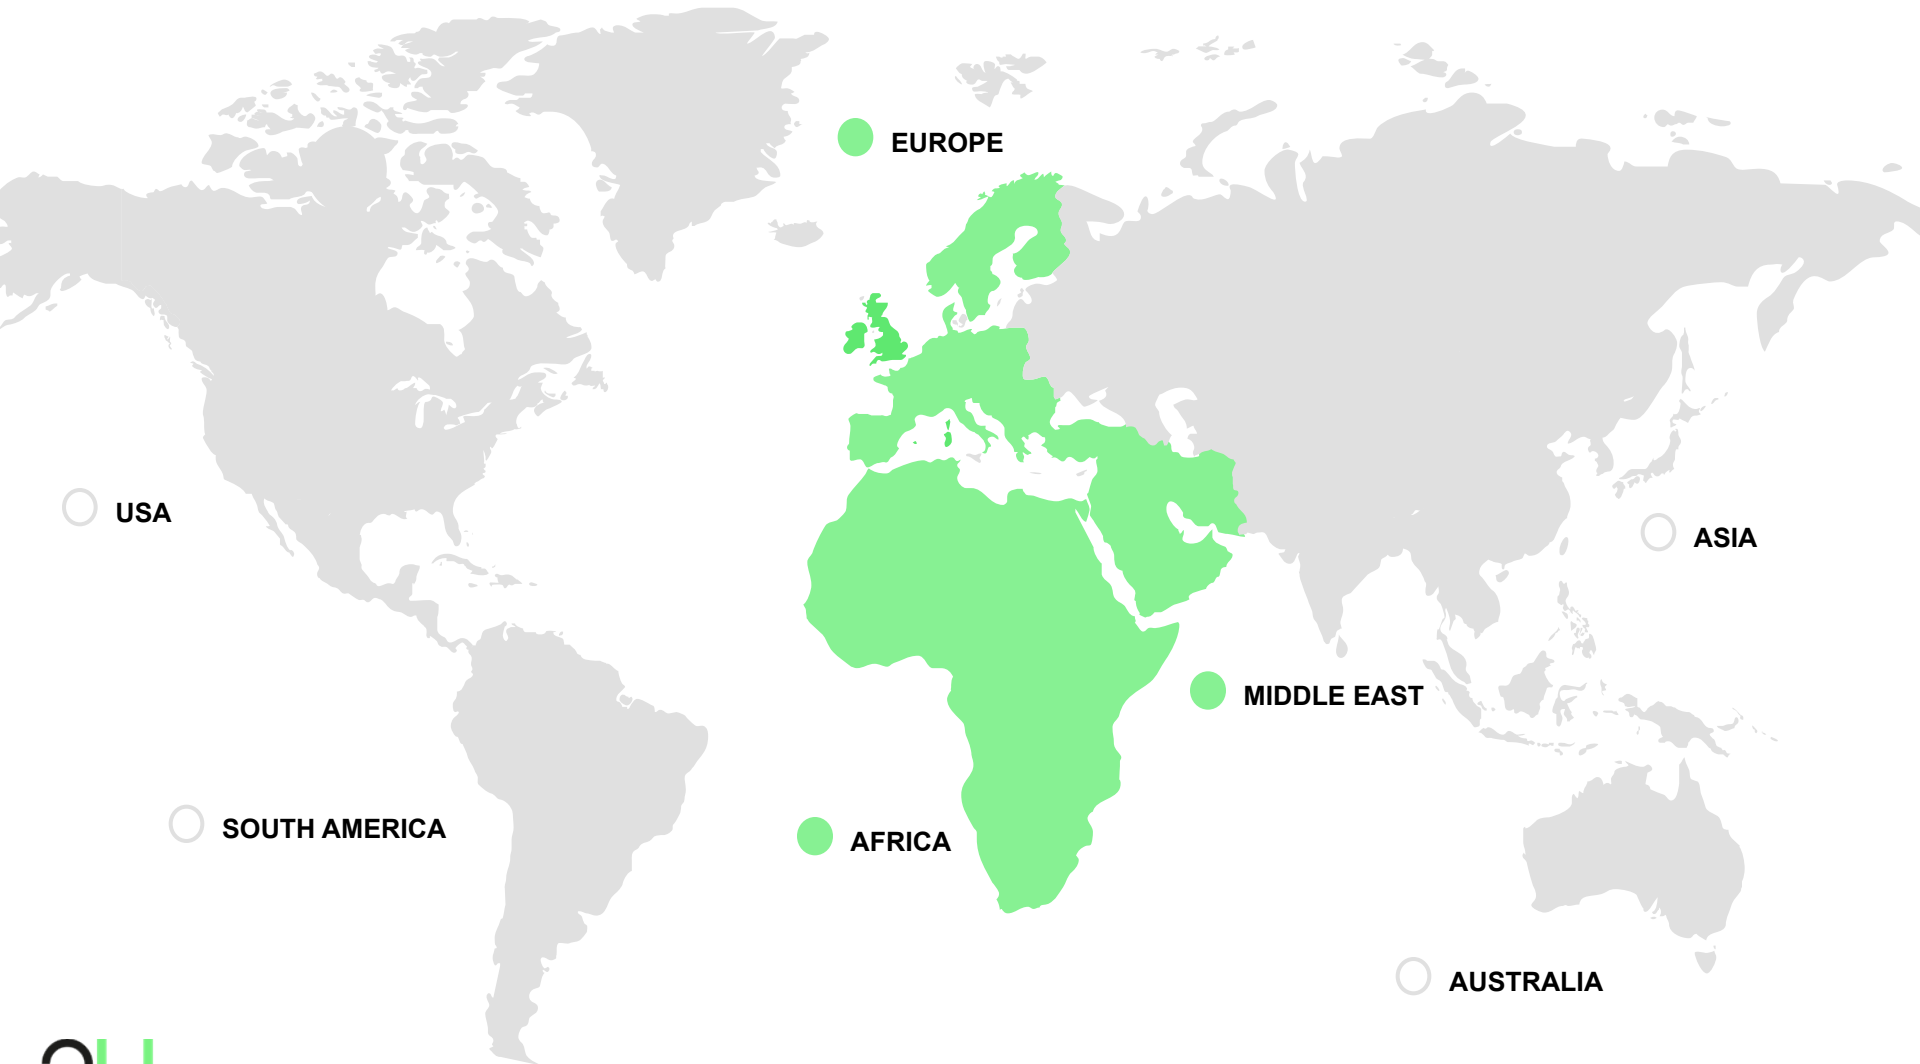

We develop a project based on a unique idea that meets your needs, making you a participant of the process step by step.

We select the best materials to be used by comparing the possible solutions, we define the timing and modes of intervention to guarantee quality and efficiency throughout the whole process.

We also keep you fully up to date with the progress of construction, logistics and furnishing installation up to delivering you the complete job.

## FURNITURE FOR INTERIORS

### HOUSES

Who are you? What are your tastes, your habits, your passions? Your home should be as unique as yourself, it should reflect your lifestyle in every precious detail.

We all have our own individual way of living the house. Some people like to live active lives, while others like to take things a little calmer, some love to cook, and some just want to create a warm and comfortable den. We aim to understand how you wish to live and to help you to achieve the most suitable environment that best suits to your needs. Whether you're a vegetarian solitary with the need for a large refrigerator capable storing all your fresh vegetables, or whether you have a large family with specific space needs, whether you love to cook for your friends, or whether you just love to relax and you look for a peaceful sanctuary with the right mood lighting in your habitat, your home must be designed around you. And this is what we do and we do well.

# OFFICES

## FURNITURE FOR OFFICES

### Workspaces

The office is the meeting place where different personalities and functions may come together. So whether it is a private studio or the headquarters of a multinational company, each function must be understood and respected.

The office is a work environment where a variety of people and personalities meet each other. Directors, colleagues, clients often have very different needs between them. Therefore it's important to provide the opportunity for everyone to feel at ease. The office must be suitable and adaptable and be able to provide isolation and social needs, catering and hospitality. The most important thing is that each space is familiar, able to reduce stress levels.

It's fundamental give a language to what is not explicit to allow people who enter in these spaces, especially customers, to grasp much more than what is obvious. Comfort shouldn't be given only from furniture but also by light, acoustics and air. All of them are starting points to begin designing.

# COMMERCIAL

## FURNITURE FOR SHOPS

### Retail, store

The store carries a unique function: it aims to attract the attention and curiosity of a stranger. How? Thanks to a subtle balance of shapes, lights and colors.

The shop is a commercial space dedicated to the sale where the product is the star and being it, it needs visibility and accessibility. Functional aspects, lighting and interior paths are critical to enable customers to get in touch with all the products. But not only. Spaces must be easy to keep and to be reached by the operators; the windows on the street - the soul of the store - must invite the passerby to enter, without fear, even only for curiosity; the materials used must be practical, functional, robust; the owner's dream should be respected. 2H realizes stores able to express all these needs.

# HOTEL

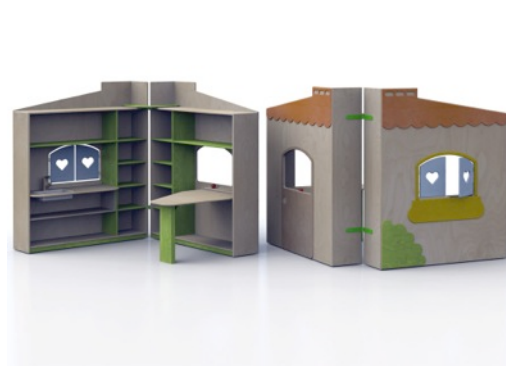

## CHILDREN SPACES FOR HOTELS

### HOTEL, RESORT, APPARTHOTEL

2H creates spaces for children in hotels and tourist areas. In addition to the practical needs of the environment, we take care of the little traveler's needs.

Travelling child is still a child. He needs space where he could express himself, free his creativity, have fun, say "Wow!". The furnishings of these spaces have to be flexible because usually there are no big sizes available and different moments must be able to coexist: reading, manipulative, painting and motor activities, small shows and group activities. The areas for children in the hotel can be arranged in interior spaces but also outside. They may be thematic (stories, environments) or traditional.

**Nursery schools, kindergartens, playgrounds, game points.**

Tangram is the brand of 2H, which for over 25 years is the reference point for the design and implementation of complete furniture solutions for kindergartens, preschools, playgrounds, libraries and playgrounds.

Fostering in a child, even with the furniture, the possession of the environment, creativity, and gradual increase of the autonomy and power of choice imposes the use of excellent materials, and careful construction techniques respecting the requirements of safety, hygiene and durability. Listening to all specific needs, including the educational project, and carefully evaluating the everyday dynamics of each structure, 2H lays the foundations on which is based every project of functional organization of the spaces. Because furnish the environment for children with success, consists mainly in creating the conditions for hospitality and welfare of those who will use it. Children, their welfare, their growth in an environment that is safe and functional, furnished as they like it, are the points of departure and of arrival of each of our project.

# DESIGN

## DESIGN OBJECTS

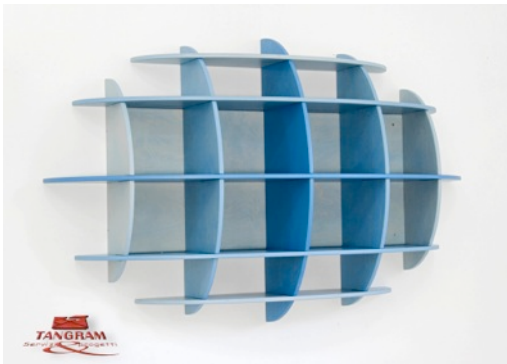

### **Chairs, tables, objects, complements**

The design is the path of thought that goes through the material, shape and color, starting from the expressed need to arrive to the object.

For our design objects we prefer wood because it is a natural material. It can be easily processed and treated according to requirements, giving comfortable sensations.

Then there are the forms. Once again we like to inspire the forms from the nature. The circle is the first form that we learn to know because it is the mother's face, is the most familiar form around us, the most present in nature. Think of the planets, gravity force, universes. The square is the setting that contains us, gives us security. The triangle is the complexity, aggressiveness, impulsiveness. Together these forms can generate new figures, despite being complex they will always be easily understood.
